DEPARTMENT HIGHLIGHTS

Finding employment in one's major field can sometimes be a challenge, but a business minor will open doors to a range of opportunities at different companies or organizations.

The business minor at D&E allows students enrolled in non-business programs to supplement their

education with a better understanding of business concepts with six courses, only 18 hours.

Davis & Elkins College has received specialized accreditation for its Business programs through the International Assembly for Collegiate Business Education (IACBE).

WHY MINOR IN BUSINESS?

Having a minor in business can be useful in whatever field of study is selected whether it be fine and performing arts, sports management, social sciences or criminology. A business minor permits you to go into your chosen field and have the tools necessary to manage a business or even start your own.

Employers will know you are driven because you followed your vocational passion and will undoubtedly appreciate the time management and organization of someone who balanced a major and minor in college.

A minor in business will provide you with an educated perspective, allowing for smarter decisions in local and global markets. Having a business minor will provide you with a valuable skill set for the professional world, and will set you apart from your peers. Graduates in any discipline are more marketable to a company or organization with a business minor. It helps in making sense of the increasingly complex global market and opening doors to future opportunities. Adding a minor to any major will ensure you leave D&E a problem solver, a communicator and, most importantly, a professional.
