1. Getting Started

About

Alcatel-Lucent 8001 Deskphone is a highly innovative VoIP SIP phone. It can perfectly satisfy all kinds of businessmen's communications. Alcatel-Lucent 8001 Deskphone integrates a 132x64 pixels graphic LCD, a large resolution display, elegant and intuitive user interface, which you can perfectly experience. Its rich features can effectively improve business communications. Alcatel-Lucent 8001 Deskphone meets the demands of SMEs, Home Office and large enterprises.

Feature Highlights

- a) **Multi-Language**
The LCD display supports Multi-Language.
- b) **HD Voice**
Special voice processing technology, high-fidelity voice quality, HD encoding, HD Handset, ensure clear, realistic and smooth communication.
- c) **Advanced Calling Capabilities**
Two lines with double color (GREEN & RED) LEDs, Synchronously control or manage 2 calls, Call queue, Switch between lines. Multi-parties conference, call transfer.
- d) **All kinds of Phone Book**
It supports XML Personal Phone Book\LDAP\Enterprise Phone Book etc. This feature satisfies customer's phone book requirements.
- e) **Support of HTTP\TFTP\FTP\Auto-Provision.**
- f) **Support of POE and Power Adapter.**
- g) **2-angles adjustable bracket, wall-mountable**

2. Set up the Phone

a) Packing List:

Check the packing list before installation, if you find anything missing, please contact your system administrator.

- 1*Alcatel-Lucent 8001 Deskphone IP Phone
- 1*Handset

- 1* Handset Cord
- 1* Ethernet Cable
- 1* Phone Bracket
- 1* Safety sheet

b) Phone Installation:

This section introduces how to install the phone with the components available in the pack:

- Attach the Bracket
- Connect the Handset and optional Headset
- Connect the Network and Power

Attach the Bracket

Please firstly let the part 1 of the bracket join the phone by following steps "a" to "b" as shown here-after, and then let the part 2 of the bracket join the lower holder or upper holder depending on the desired phone angle: respectively high or low.

Connect the Handset and optional Headset

Connect the Network and Power

You have two options for power supply. Your system administrator will advise you which one to use.

- AC power adapter
- POE(Power over Ethernet) IEEE802.3af

Note: If POE is available, the phone doesn't need to connect to the AC power adapter. Make sure the Ethernet cable and switch/hub is POE compliant.

3. Phone User Interface

3.1 Hardware Component Instructions

The main hardware components of the Alcatel-Lucent 8001 Deskphone IP Phone are the LCD screen and the keypad.

Hardware components of the Alcatel-Lucent 8001 Deskphone are described as follows:

	ITEM	DESCRIPTION
1	LCD Screen	Displays information about calls, messages, soft keys, time, date and other relevant data: <ul style="list-style-type: none">• Call information — caller ID, call duration• Icons (e.g. )• Missed calls or second incoming caller's information• Time and date

3.4 SIP Account Settings

8001 IP phone makes calls based on SIP accounts. It can support one account or Two-accounts. Each account can be configured to a different SIP server.

If you want to...	Then...
Create a SIP account	<p>--1) Select "System setting" > "Advanced setting";</p> <p>--2) Enter the password required (By default: empty) ;</p> <p>--3) Select "SIP" > "Account sip";</p> <p>--4) Select one of the accounts you want to set, you can configure the following parameters</p> <ul style="list-style-type: none"> -Enable account*: Select Enable -Number of lines: Default is 2 -Description: description of this account -Display Name: The name displayed on the screen -Authentication user: the Authenticated users are matched with the SIP server.(By default with the same account) -Account*: the account matches with the SIP server (extension number) -User password*: the user password matches with the SIP server -SIP Server*: The primary SIP server, all calls through this server -Out Bound Server: The outbound SIP server -STUN Type: Enable/Disable STUN feature -STUN: Input STUN URL -Auto Answer: Enable/Disable this account auto answer feature <p>* Note: When you finish the setting, you can press Save to activate it, and then you can see the status icon in the LCD idle.  The parameters with the * mark here above must be set.</p>
Disable SIP account	<p>--1) Select "System setting" > "Advanced setting";</p> <p>--2) Enter the password required (By default empty) ;</p> <p>--3) Select "SIP" > "Account sip";</p> <p>--4) Select "Enable account" > "Disable";</p> <p>--5) Select "Save" to save settings</p>

3.5 Basic Features

3.5.1 Making a Call

Here are some easy ways to place a call on 8001 IP Phone:

If you want to...	Then...	
Place a call using the handset	Pick up the handset	--1) You can hear dial tone; --2) Enter a number; --3) Press # button (default setting), -or wait 5s (default value), then the 8001 deskphone sends the number automatically.
Place a call using a speakerphone	Press Speaker button	
Place a call using a headset	Put on your headset, by pressing Headset button so that the status light is Red  , and then do as using speakerphone	

3.5.2 Anonymous Call

You can use anonymous call feature to block the identity and phone number from showing up to the called party when making a call. E.g, you want to call to consult some of the services, but you don't want to be harassed.

Enable Anonymous Call	Press OK or MENU> Function Setting> Anonymous
	--Press Enter or OK button , -You can select which Account you want to use, enable/disable this feature and enable/disable rejecting anonymous calls

3.5.3 Redial

To redial the last placed call from your phone

Redial	--Press REDIAL button to dial the last number
--------	--

	-or press Navigation button-Left > "Dialed number", select a number, and press Dial
--	---

3.5.4 Call Log

Dial from a call log	<p>--1) Press MENU or OK button > "Call history", you can select "All Calls", "Missed calls", "Received calls" and "Dialed numbers",</p> <p>- or press Navigation button (in Standby interface) > select "All Calls"(up) "Missed calls"(down), "Received calls"(left) and "Dialed numbers" (right)</p> <p>--2) Then press Dial button.</p> <p>NOTE: You can also press the "log" to login to this menu when in the idle state.</p>
----------------------	---

3.5.5 Making Calls to Contacts

You can also dial a contact from the Personal Phone Book.

Placing Calls to Contacts	<p>--1) Press MENU or OK button > "Phone Book", you can select "Personal Phone Book", "Enterprise Phone Book", "LDAP" and "Black List",</p> <p>- or press Navigation button (in Standby interface) > select the desired contact.</p> <p>--2) Then press Dial button.</p> <p>NOTE: You can also press the "DIR" to login to this menu when in the idle state.</p>
---------------------------	---

3.5.6 Multi-lines to Answer the Call

Multi-lines to Answer	--1) Another Line button is Red  and flashing, Light strip is Red
-----------------------	---

the Call	<p>and flashing;</p> <p>--2) Press the flashing  Line button to answer (at this time, the original call will be put on hold.)</p>
----------	---

3.5.7 Auto-Answer

You can set the phone and let it auto-answer incoming calls.

Auto-Answer the Coming Call	<p>--1) Enable the Auto-Answer feature.</p> <p>--2) In Auto-Answer mode you can select one of the following options in the MENU>Function Setting> Auto Answer >Device</p> <ul style="list-style-type: none"> ● Speaker ● Handset ● Headset <p>Note that if you use the Handset mode, you need to pick up the handset to get the call.</p> <p>--3) Filter Groups</p> <p>Auto-answer the incoming call from these special groups.</p>
-----------------------------	---

3.5.8 Ending a Call

To end a call, here are the options available in different contexts.

Hang up while using the Handset	<p>--Return the handset to its cradle,</p> <p>-or press End</p>
Hang up while using the Speakerphone	<p>--Press the Speaker button that is Red ,</p> <p>-or press the Line button of the appropriate line,</p> <p>-or press End</p>
Hang up while using the Headset	<p>--Press the Headset button, (Do not keep the headset mode) ,</p> <p>-or press End (keep the headset mode)</p>

Hang up one call, but preserve another call on the other line	--Press End , -or refer to the above three methods
---	--

3.5.9 Using Hold and Recover (Switch Calling Line)

You can hold and resume calls. You can take a call in one line at anytime, and the other lines would be put on hold. As a result, you can switch between different calling lines on your phone.

If you want to...	Then...
Put a call on hold	--Press the HOLD button, -or press the soft key Hold
Hold a line and switch to another line	Press another Line button for the appropriate line
Resume a call on current line	--Press the Line button,
Resume a call on different line	Select the line you want to retrieve, then press the line button

NOTES

- Engaging the Hold feature typically generates music or a beeping tone.
- A held call is indicated by the Yellow-green  and flashing Line button or a "Hold" on the LCD.

3.5.10 Transferring Calls

Transfer redirects a connected call. The target is the number to which you want to transfer the call.

Talk to the transfer recipient before transferring a call (consult transfer)	--1) Press TRANSFER button or press XFER; --2) Enter number; --3) press "#" (default) , -or press Send then transfer the call, -or wait five seconds (default value) then transfer the call

T9 Search	--1) Press MENU or OK button > "Function Setting", you can select " T9 search" --2) Then press Enable/Disable and Save. --3) When you are back to idle state, you can use the digital keypad to search the contact using T9 method.

NOTES: The Search Phone Book setting default is Accurate Search.

3.7.6 Features that cannot be set with the Keypad

Below features cannot be set with the keypad:

- 1) Dial Plan.
- 2) Custom Ring Type
- 3) SNTP Server and Time & Date
- 4) Update the Firmware or Backup the configuration file.

4. WEB User Interface

In addition to the phone user interface, you can also customize your phone via the web user interface. In order to access the web user interface, you need to know the IP address of your new phone. To obtain the IP address, press the “C” key on the phone. Enter the IP address (e.g. HTTP://192.168.0.10 or 192.168.0.10) in the address bar of the web browser on your PC. The default user name is root (case-sensitive) and the default password is root (case-sensitive).

Main Interface-Phone Status

Here-below you can see the home page: System Run Time, Registration Status, Network Status, System Information:

The screenshot shows the Alcatel-Lucent web interface. The top navigation bar includes the Alcatel-Lucent logo, a user menu (Administrator | Logout), and a language selector (English(English)). The left sidebar contains a menu with options: Phone Status, Network, SIP Account, Phone Setting, PhoneBook, Phone Maintenance, and Security. The main content area is titled 'Current Location: Phone Status' and displays the following information:

Section	Item	Value
System Run Time	System Run Time	4 Days23 Hours54 Minutes57 Seconds
	Register status	
Account1	Account1	Registered
	Account2	Unregister
Network Status	LAN Connection	Static
	MAC Address	00:26:8b:01:e4:e2
	LAN IP Address	192.168.0.114
	Netmask	255.255.255.0
	Gateway	192.168.0.1

Please Note: Changing the default HTTP Port (80) will require using the new port number to access the IP phone web interface. Please note that changes require a reboot. Use the following format when not using the default HTTP (<http://ip address:portnumber>).

ITEM	DESCRIPTION
Port Management Settings	
HTTP Port	The default web port is 80,if you want to change it (for example change to 88), You must input IP and Web port to login to the web page (for example HTTP://192.168.0.200:88). It will take effect on the next reboot.
Telnet Port	The default Telnet port is 23,if you want to change it (for example change to 2003). You must input IP and Telnet port to login to the management page (for example telnet 192.168.0.200:2003).It will take effect on the next reboot.
Socket5 Proxy Server	

Socket5 Proxy Server	Enable/Disable Socket5 Proxy Server.
Server IP	Socket5 Proxy Server IP address.
Port	Socket5 Proxy Server port, default is 1080.
Anonymous Login	Enable/Disable Socket5 Proxy Server login username.
Paging Setting (NOTE: This feature priority is followed the serial number, In other words, "paging 1" is the highest priority)	
Paging1	Enable/Disable Paging feature.
Group IP and Port	Group IP and Port with Paging.

4.1.2 PC Port

Normally choose Bridge, if you choose Router, you need to input router IP address, net mask.

The screenshot shows a configuration window for the PC Port. At the top, there are two radio buttons: 'Bridge' (selected) and 'Router'. Both have a question mark icon next to them. Below the 'Router' option, there are several input fields: 'IP Address' (required, marked with an asterisk), 'Netmask' (required, marked with an asterisk), 'DHCP Server' (a toggle switch currently set to 'off'), 'Start IP', and 'End IP'.

Bridge

Normally, you should choose “bridge” feature, it means that pc port and LAN port will share the same network.

Router

Router feature is for the phone PC Port. You must input IP address (it’s equivalent to a gateway) and Net mask. If you want to use DHCP function, please turn it on, input start IP and end IP.

4.1.3 Advanced

VPN Setting

Enable VPN	<input type="checkbox"/>
VPN Type	L2TP ▼
L2TP	
VPN Server Addr	<input type="text"/>
VPN Username	<input type="text"/>
VPN Password	<input type="password"/>
OPEN VPN	

When using VPN Setting option, you can set several parameters as follow:

VLAN Setting	
Enable VPN	You can enable/disable VPN for phone and pc.
VPN Type:	Choose the appropriate type of VPN.
VPN Server Addr	VPN server IP address.
VPN User Name	VPN user name
VPN Password	The password is used for authentication

VLAN Setting

Enable Vlan:	<input type="checkbox"/>		
LAN Port		PC Port	
VID:	<input type="text" value="0"/> (0~4094)	VID:	<input type="text" value="0"/> (0~4094)
Priority:	<input type="text" value="0"/> ▼ (0~7)	Priority:	<input type="text" value="0"/> ▼ (0~7)

When using VLAN Setting option, you can set several parameters as follow:

VLAN Setting	
Enable VLAN	You can enable/disable vlan for phone and pc
VID [LAN/PC Port]	The vlan ID you want the phone or pc to join

5 SIP Account

Ring Type	None ▾ ?

Choose one Account, you will find the following parameters:

ITEM	DECSRIPTION
Enable	You can choose on/off to enable/disable the line.
Account Mode	Please keep this selection on VOIP (do not select and PSTN),.
Amount Of Line Account Used	This is the number of accounts used, default is 2
Display Name	This entry is shown as Caller ID when the user makes a phone call

Username	This is a username provided by SIP Server
Authenticate Name	This is the ID for authentication
Password	This is a password provided by SIP Server
Label	Label for this account.
SIP Server	Server for registration, provided by the administrator
Secondary server	When the main server is not available, this device can register to this secondary server.
Outbound Proxy Server	Address of the outbound proxy server.
Secondary Outbound Proxy Server	When the main outbound server is not available, this device can use this secondary outbound proxy server.
Polling Interval Time Of Registration	Polling Interval Time Of Registration, default is 32 s.
NAT Traversal	Defines whether the STUN server should be active or not
STUN Server	S ession T raversal U tilities for N AT (STUN) server address
BLA	Bridge Line Appearance (BLA), also named 'Shared Line Appearance (SLA) With this BLA configuration, the 8001 set monitors a shared line status.
BLA Number	BLA Number
Subscribe Period	Subscription expiration time.
Register Expire Time	Interval after which the IP phone automatically re-registers
SIP Transport	There are three options; UDP/TCP/TLS
Ring Type	Select the ringing type for this account.

5.2 Call

Do Not Disturb	<input checked="" type="radio"/> off <input type="radio"/> on
Anonymous Call	<input checked="" type="radio"/> off <input type="radio"/> on 
Anonymous Call Rejection	<input checked="" type="radio"/> off <input type="radio"/> on

ITEM	DECSRIPTION
Call	
Pickup Function	Allows other users to answer your incoming calls.
Pickup Code	Fill in server's pickup code.
Message	Fill in voice mail's access code.
Booking Voice Mail	By enabling this feature, the phone message light will be lit when you receive a voice message.
Play Voice Mail Tone	By enabling this feature, the phone will ring when you receive a message.
Miss Call Display	Turn on or off the option to display Missed calls on the phone screen.
DND Soft key	Enable/Disable the Do Not Disturb feature.

Play Hang-up Tone	Enable the tone for hang up when busy.
Transfer Code	The code for transfer feature.
Conference Exit Result	Choose what should happen when the Conference originator hangs up: either keep the communication between the two other parties, or hang up the whole conference.
Return Code When Refuse	Select the code to feedback to the server when you reject the call.
Return Code When DND	Select the code to feedback to the server when you a call is rejected because of your DND function enabled.
Flash Hook Time(<800ms)	The time for the flash hook.
Called No Answer Time	When you receive an incoming call while this feature is enabled, and if you don't answer the call, the caller will receive a time out after the here-defined "Called No Answer Time" has elapsed.
Pound Send Method	Following RFC2396, the "#" will be interpreted as '#' or as %23 in the SIP request method, depending on what you define here.
RFC 2833 Play Load	Default is 101, RTP Payload for DTMF Digits, Telephony Tones and Telephony Signals
P-Asserted-Identity	Enable/Disable the P-Asserted-Identity feature.
SIP Session Timer T1	The SIP Session Timer T1 settings.
SIP Session Timer T2	The SIP Session Timer T2 settings.
SIP Session Timer T4	The SIP Session Timer T4 settings.
Local SIP Port	The port range settings for SIP, default is 5060.
RTP Port Range	The port range for RTP
Affiliated Port	Enable/Disable the affiliated port feature.
Headset Mode	Select headset mode as normal or seat.
Ring Type On Seat Mode	Select ring type mode with headset or speaker.

6.1.3 VoIP Call Forward

Always	<input checked="" type="radio"/> off <input type="radio"/> on	Number: <input type="text"/>	?
If Busy	<input checked="" type="radio"/> off <input type="radio"/> on	Number: <input type="text"/>	?
If No Answer	<input checked="" type="radio"/> off <input type="radio"/> on	Number: <input type="text"/>	?
Ring Frequency	<input type="text" value="15"/>	Seconds (Default: 15s, Max: 15s)	

ITEM	DECSRIPTION
Always	Always transfer the incoming calls (enter the destination number).
If Busy	If the phone is busy, the call will be transfered (enter the destination

	number).
If No Answer	If the call is not answered, the call will be transfered (enter the destination number).
Ring Frequency	Here you define the time interval before an incoming call is forwarded (when forward "if no answer" is enabled)

ITEMS	DESCRIBES
Line	Line is the default value.
Speed Dial	You can use this key feature to speed up dialing the numbers that are often used or hard to remember.
Speed Dial Prefix	You can use this key feature to speed up dialing a specific prefix number.
DTMF	You can use this key feature to send arbitrary key sequences via DTMF.
BLF	You can use the BLF (Busy Line Field) feature to monitor a specific user for status changes on the phone.

Paging	You can use multicast paging to quickly and easily forward time sensitive announcements out to people within the multicast group.
Call Park	You can use call park feature to place a call on hold, and then retrieve the call from another phone in the system (for example, a phone in another office or conference room).
Intercom	You can press the configured intercom key to automatically connect with a remote extension for outgoing intercom calls, and the remote extension will automatically answer the incoming intercom calls
BLA	Bridge Line Appearance (BLA), also named 'Shared Line Appearance (SLA) With this BLA configuration, the 8001 set monitors a shared line status.

NOTE: ONLY WHEN YOU CHOOSE "SPEED DIAL", THE RIGHT OF "NAME","NUMBER" WILL TAKE EFFECT.

6.4 Function Keys

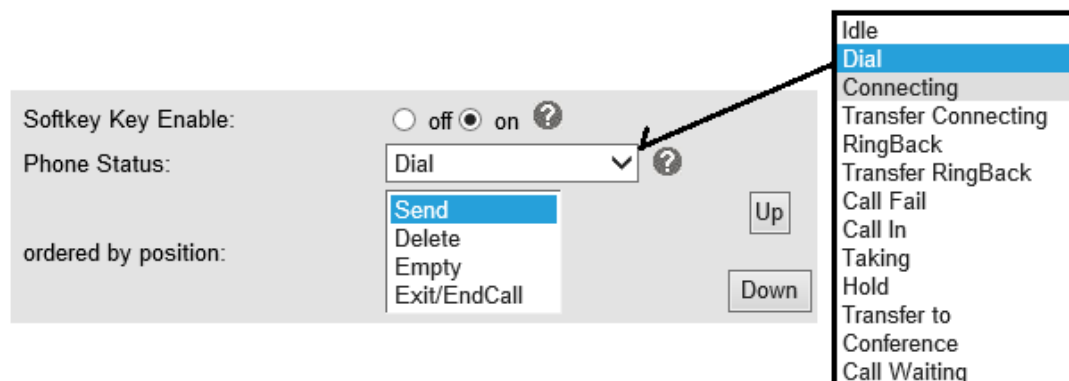

Function Keys: If you do not like the default setting with the function keys feature. You can change to whatever you want.

NOTE: IF THE PHONE DOESN'T HAVE THE KEY, PLEASE IGNORE IT.
